

## SSD Utility Release Notes

Version: 5.4.0010 Release: October 28, 2021

This SSD Utility V5.4.0010 is only compatible with KIOXIA brand SSDs (EXCERIA PRO SSD and EXCERIA G2 SSD).

### Outline

This is an update release of SSD Utility, with the following enhancements:

Bug fixes and reliability enhancements.

Bootable SSD Utility is not supported. Secure Erase is supported by Bootable Media.

### Known Issues

On some PCs it is impossible to perform secure-erase: this happens if the PC BIOS issues SECURITY FREEZE LOCK the drive, and does not implement the suspend/resume cycle used to unfreeze it. Workaround is to use the secure erase feature in the BIOS if there is one, otherwise to perform secure erase on another PC.

On some laptops with dual Intel® & NVIDIA graphics, SSD Utility may crash. This can be fixed by updating the Intel & NVIDIA drivers.

Secure Erase may produce an error if the target drive is in use (for example, drive is being read or written to).
